Sept 2019 - Dec 2022

Bachelor of Science, Computer Science, GPA 3.77/4.00

Chemeketa Community College, Salem, Oregon

Sept 2016 - June 2019

Associate of Science/Oregon Transfer Degree, GPA 3.74/4.00

WORK EXPERIENCE

Proworks Corporation, Corvallis, Oregon

Nov 2022 - Present

Junior Developer

- Effectively communicated technical and developer perspectives to non-technical team members and clients, facilitating clear understanding of complex concepts and ensuring alignment between development and project goals.
- Creating and organizing comprehensive documentation for project setup instructions, onboarding training notes, and addressing potential issues including the identification and resolution of common challenges related to project setup and maintenance.
- Performed junior-level .NET development, IT tasks, and custom component creation using Umbraco and C#.
- Worked both independently and within a cross-functional team to apply contemporary web development best practices, estimate development tasks, and provide quality assurance for software applications.

VIP Jewelers, Salem, Oregon

June 2018 - May 2022

Office Admin

- Maintain detailed records of finance reports and distribution of employees paychecks.
- Responding to customers' needs and interpreting customer requests from emails, phone, and documents.
- Complete assigned data entry requests and tasks by sorting and verifying data for inventory and client information.

SKILLS

Programming languages: C++, C, C#, Python, HTML, CSS, JavaScript

Content Management Systems (CMS): Drupal, Umbraco

Software tools: IIS, SQL Server, GitHub, Git, Bitbucket, Microsoft Office (Word, Excel, PowerPoint), Figma, Sketch, Docker

PROJECTS

Craft Center Web Registration (link) (Document link) // HTML, CSS, Javascript

- Led the project as the team captain, overseeing all aspects of development and coordination, actively communicated with the Craft Center's director and student employees to identify pain points and user preferences, and ensured reports were consistently prepared in accordance with organizational standards.
- Developed a web registration for the Oregon State University Craft Center to allow users to independently register to become members online, search and view classes without having to be on location.
- Assisted and assessed UI and UX designs using low and high fidelity prototypes, creating simple and intuitive user interfaces that allows users to be able to search through more than 20+ classes.

Android Movie Picker App (link) // Java, Android Studio

- Designed an interactive Android mobile application that uses a third-party movie API to allow users to generate a movie suggestion by filtering to their preferences based on language and genre.
- Implemented YouTube Android API on mobile application allowing users to view movie trailers based on the movie's they've selected.
